CAPTEL[™]

THE CAPTIONED TELEPHONE

The Amplified Telephone that Includes Written, Word-for-Word Captions of Everything the Caller Says

Identities the control of the contro

Ideal for people with some degree of hearing loss, the Captioned Telephone (CapTel) works like any other telephone with one important addition: it displays every word the caller says throughout the conversation. CapTel users can listen to the caller, and can also read the written captions in the CapTel phone's bright display window.

Written captions of everything the caller says appear in the *CapTel* phone display screen.

Who Benefits from CapTel?

- Anyone with some degree of hearing loss, who finds it difficult to understand telephone conversations
- People using hearing aids or assistive listening devices
- People who are deaf or hard of hearing and voice for themselves

"I love being able to hear the person's voice because I can understand a lot of what they say... But the captions are there for me to see if I did not understand."

Benefits of CapTel

- Calls are made in a natural manner simply dial the telephone number directly for the person you are calling
- Users enjoy natural telephone conversations, and can check the captions for added clarity
- Everyone can use CapTel phone simply turn off the captions feature to use it as a traditional telephone
- Captions appear nearly simultaneously with the spoken words
- CapTel includes an amplified handset and tone control for clarity

CAPTEL USER

5 ...for you to

read on the

CapTel display.

1 You talk to the other party...

2 ...who talks back for you to hear.

CAPTIONING SERVICE

...which transcribes their words into captions...

OTHER PARTY

3 Everything they say also goes through a Captioning Service...

How Does CapTel Work?

CapTel users place a call in the same way as dialing a traditional phone. As they dial, the *CapTel* automatically connects to a captioning service. When the other party answers, the *CapTel* user hears everything that they say, just like a traditional call.

A specially trained operator at the captioning service transcribes everything the other party says into written text, using the very latest in voice-recognition technology. The text appears on a bright, easy-to-read display window built into the CapTel. The captions appear almost simultaneously with the spoken word, allowing *CapTel* users to understand everything that is said — either by hearing it or by reading it.

What Equipment/Services are Needed?

1. A Captioned Telephone (CapTel)

A specialized telephone that interacts with the captioning service to display captions. The telephone does not translate spoken words into written captions all by itself. It can also be used as a traditional amplified telephone.

2. Captioning Service

Captions are provided by the captioning service throughout the conversation at no cost to the *CapTel* user.

The CapTel phone is currently available only in states that offer CapTel service as part of their relay or in states conducting consumer trials.

Specifications

- Powerful amplification with volume boost(up to 35dB) for maximum volume
